Geomorphology, 5 (1992) 547–548
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 5, 1992

Introduction 1
Fractals and morphometric measures: is there a relationship?
B. Klinkenberg (Vancouver, B.C., Canada) 5
The relationship between catchment and hillslope properties: implications of a catchment evolution model
I. Rodriguez-Iturbe (Caracas, Venezuela) 21
Fluvial landsculpting and the fractal dimension of topography
C.G. Chase (Tucson, AZ, USA) 39
A physical basis for drainage density
D.G. Tarboton (Logan, UT, USA), R.L. Bras (Cambridge, MA, USA) and I. Rodriguez-Iturbe (Caracas, Venezuela) 59
Tectonic, climatic and lithologic influences on landscape fractal dimension and hypsometry: implications for landscape evolution in the San Gabriel Mountains, California
N.A. Lifton and C.G. Chase (Tucson, AZ, USA) 77
Measurement of self-affinity on surfaces as a trial application of fractal geometry to landform analysis
S. Ouchi and M. Matsushita (Tokyo, Japan) 115
Estimating fractal dimension with the divider method in geomorphology
R. Andrie (Storrs, CT, USA) 131
Drainage basin perimeters: a fractal significance
S.P. Breyer and R.S. Snow (Muncie, IN, USA) 143
Fractal dimensions of sinkholes
M.W. Reams (Kankakee, IL, USA) 159
Fractal characteristics of desert storm sequences and implications for geomorphic studies
L. Mayer (Oxford, OH, USA) 167
The Cantor dust model for discontinuity in geomorphic process rates
R.S. Snow (Muncie, IN, USA) 185

Preface iii
The end of equilibrium?
J.D. Phillips (Greenville, NC, USA) 195
Theoretical and methodological premises of geomorphological forecasting
A.M. Trofimov (Kazan, Russia) and J.D. Phillips (Greenville, NC, USA) 203
Limitations of the system approach in geomorphology
A.E. Scheidegger (Wien, Austria) 213
Nonlinear dynamical systems in geomorphology: revolution or evolution
J.D. Phillips (Greenville, NC, USA) 219
Hutton to Horton: views of sequence, progression and equilibrium in geomorphology
B.A. Kennedy (Oxford, UK) 231
New wine in old bottles: the historiography of a paradigm change
D. Sack (Madison, WI, USA) 251
Equilibrium, disequilibrium, and nonequilibrium landforms in the landscape
W.H. Renwick (Oxford, OH, USA) 265
Some comments on equilibrium concepts and geomorphic systems
L. Mayer (Oxford, OH, USA) 277
On the multifractal characterization of river basins
E.J. Ijjasz-Vasquez, I. Rodriguez-Iturbe and R.L. Bras (Cambridge, MA, USA) 297
Nonequilibrium geomorphic processes and deterministic chaos
G.P. Malanson (Iowa City, IA, USA), D.R. Butler (Athens, GA, USA) and K.P. Georgakakos (Iowa City, IA, USA) 311
Process interactions, temporal scales and the development of hillslope gully systems: Howgill Fells, Northwest

England
A.M. Harvey (Liverpool, UK) 323
Energy time, and channel evolution in catastrophically disturbed fluvial systems
A. Simon (Vancouver, WA, USA) 345
Thresholds and the spatial variability of flood power during extreme floods
F.J. Magilligan (Hanover, NH, USA) 373
Response of the Connecticut River estuary to late Holocene sea level rise
P.C. Patton and G.S. Horne (Middletown, CT, USA) 391
An equilibrium relationship for shear velocity and apparent roughness length in aeolian saltation
D.J. Sherman (Los Angeles, CA, USA) 419
Statistical models of fluvial systems
B.L. Rhoads (Urbana, IL, USA) 433
The morphology of graded gravel rivers: a network perspective
J.E. Pizzuto (Newark, DE, USA) 457
Character of headwaters adjustment to base level drop, investigated by digital modeling
P.R. Bonneau and R. Scott Snow (Muncie, IN, USA) 475
The Binghamton Symposia in Geomorphology 489

King of the plains: Lester King's contributions to geomorphology
C.R. Twidale (Adelaide, S.A., Australia) 491
Quaternary erosion in the Sognefjord drainage basin, western Norway
A. Nesje, S.O. Dahl, V. Valen and J. Øvstedahl (Bergen, Norway) 511
Morphology and chronostratigraphy of a coastal dunefield; Groote Eylandt, northern Australia
J. Shulmeister and B.G. Lees (Canberra, A.C.T., Australia) 521
Reconstruction of a debris-slide-initiated flood in the southern Kenai Mountains, Alaska
G.C. Wiles and P.E. Calkin (Amherst, NY, USA) 535
